### **Duke Energy Project Underway**

*(12/18/09)* A major project is underway by Duke Energy to replace the 55 year old electrical infrastructure and substations of the Main Building. Most of the construction will take place in the parking lot behind Main Building. The loudest and most disruptive part of construction will take place over the holiday break, with some working being done on 3rd shift. Completing this project will help keep Main Campus electric online during future outages. Contact Facilities Director Ray Mirizzi, 513-569-1561, with questions or concerns.
